(54) SUTURING PROSTHESIS AID

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a suturing prosthesis aid which can be used in a surgical treatment to be applied for an automatic suturing instrument.

SOLUTION: This suturing prosthesis aid comprises a cylindrical body made of a cloth of an in vivo lysable and absorbable material alone or in combination with a stretchable knit textile, wherein the cloth of the in vivo lysable and absorbable material is previously provided with a pair of ripping seams as printed by a sewing machine.

LEGAL STATUS

[Date of request for examination]

22.09.2005

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
